To Whom It May Concern,

I am pleased to confirm that Isaac Zachary is a graduate of the Power Learn Project (PLP), having successfully completed our 1 Million Developers for Africa program. In addition to his outstanding performance as a learner, Isaac also volunteered in a technical support role, where he demonstrated reliability, professionalism, and a strong grasp of software systems.

One of the most notable aspects of Isaac's time in the program was his remarkable mentorship abilities and technical expertise. During our Coffee and Code / AI Safari Workshop held at the Technical University of Kenya which saw 120+ join us physically for the event, Isaac played a pivotal role in upskilling a focus group of approximately 15 young aspiring developers. He introduced them to agentic development workflows, guiding them through the creation of a full-stack e-commerce application. His leadership, clarity in communication, and ability to simplify complex technical concepts left a lasting impression.

Isaac has proven himself to be a well-rounded tech professional. He consistently exhibits excellence as a Python programmer, application developer, and web developer, and possesses a solid foundation in database management. His voluntary contributions in technical support further underscore his commitment to teamwork and service within the tech ecosystem.

At PLP, our mission is to equip aspiring developers with practical, industry-relevant skills for success in the digital economy. Isaac exemplifies this mission, having made meaningful contributions both as a learner and as a supportive team member. We are confident in his capabilities and believe he is well-prepared for future opportunities that align with his skills and experience.

Should you require any further information, please feel free to contact us.

Best Regards,

Eric Muriithi

Dean of Students

Power Learn Project (PLP)
