To Whom It May Concern

PROFESSIONAL RECOMMENDATION FOR ISAAC SIKO ZACHARY

I am pleased to recommend Isaac Siko Zachary for technical and software roles. At GES Telecommunications Ltd, I worked with Isaac during his service as a Network and Security Systems Technician from January 2019 to February 2020, and have continued working with him through SSL Security Ltd.

At GES, Isaac installed and maintained CCTV and IP surveillance systems and their supporting networks. His duties included cabling, router configuration, fault diagnosis and preventive maintenance.

Isaac undertook short-term relief assignments in SSL-managed control rooms at Pharo School and Starehe Boys, supporting CCTV monitoring and networking operations. At Koma Gardens, he assisted with network infrastructure, POS configuration and troubleshooting.

His wider assignments included CCTV installation, Wi-Fi access points, mesh networks, VLANs, network segmentation and system security. For a Ruaka site, he prepared visual layouts showing camera locations, Wi-Fi coverage and network arrangements. The quality of his designs and documentation led to periodic engagements for technical corrections, documentation and proper system setup.

In October 2026, Isaac delivered SSL's WaqForce patrol application for patrols, checkpoints and incident records, demonstrating his ability to translate operational needs into working software.

Isaac demonstrates sound technical decision-making when assessing faults, selecting configurations and recommending improvements. He combines practical troubleshooting with clear documentation and communication, working effectively with technical and operational teams.

I confidently recommend Isaac for software development, control room operations, CCTV monitoring, networking, security systems and technical support roles. Please contact me for further information.

Kind regards,

Micah Nyaboro Gesimba
